MISSION

The Development Data Partnership: (a) coordinates and aggregates demand for proprietary data on behalf of public actors; (b) links public sector challenges and domain expertise to relevant proprietary data; (c) significantly reduces the transaction costs associated with data sharing; (d) reduces duplication of effort and facilitates collaboration on development of solutions; and (e) increases transparency and accountability for integrating use of proprietary data in public good analytics.

CAPACITY

TEAM

Governance (4), Data Science and Engineering (3), Communications (2)

WORKSHOPS/EVENTS

The team conducts data partner and data science/analytics workshops in collaboration with the Data Lab

SERVICES OFFERED

Private Sector Data Access

The Partnership unlocks public good opportunities from proprietary data in a secure, responsible manner. The staff can submit a proposal on the portal to request access to datasets depending on interest and project requirements.

Partnership Hub

The Partnership Hub is the center of activity on GitHub where specialists, researchers, data scientists and contributors can find code examples as well as open issues, start discussions and learn from colleagues by example.
