MISSION

The Water GP includes numerous Global Solutions Groups: (1) Water Resource Management, (2) Water Supply and Sanitation, (3) Resilience, (4) Hydropower and Dams, (5) Water in Agriculture, (6) Water, Poverty and the Economy.

Water GP houses a Knowledge Learning Group, which is a part of the Economics Global Solution Group initiative. In collaboration with Water Supply and Sanitation GSC, Economics GSC is working on data portal where all the water data will be catalogued on DDH.

SERVICES OFFERED

DATA SERVICES

- **Operational Intelligence**
Dashboards of Lending and Non-lending (ASA) projects customized for your GSG/Business line so you can better understand and influence trends. Merge institutional data and GSG self-maintained data to enable thorough analyses.
- **Portfolio Monitoring**
Build live databases with a user-friendly interface. Always up-to-date and easily accessible, the feed is configured to update your pipeline by business line.
- **Knowledge Management**
Organize effective knowledge bases to quickly access resource materials. Provide flexible search criteria based on subject matter, date of publication and geographic relevance

PRODUCTS

Water Data Portal

The Water GP is in the process of setting up a water data portal that will serve as a one-stop-shop for all water-related data. This will include data collected and generated for water

GP ASAs, work bank-sponsored urban and rural water resources platforms like IBNET and SIASAR, other data from projects and will also link to external websites.

Economics and sanitation tool (ESI tool)

Economics and sanitation tool (ESI tool) help in cost benefit analysis of sanitation interventions. It offers a lot of base data included in the tool kit.

AskWater

AskWater is a repository for background information and for data. Economic and Sanitation Initiative (ESI) tool kit breaks down the costs of sanitation interventions.

PARTNERSHIPS

External

Global Water Security and Sanitation Partnership – multi-donor trust fund which housed by Water GP which funds a lot of analytical work that feeds into Water GP operations.

OTHER HIGHLIGHTS

To know more about Water Data work:

- Utilities, Tariffs – IBNET: <https://www.ib-net.org/>
- Rural water and sanitation - SIASAR: <http://www.siasar.org/en>.
- Report on water quality
(<https://openknowledge.worldbank.org/handle/10986/32245>) assembled one of the largest databases on water quality. This will be made available through DDH and the water data portal.
